Introduction to English I

Content of tests

The testing program titled the *Tennessee End of Course Assessment* was established to meet the Tennessee mandate for end of course assessments in Tennessee secondary schools. These tests measure the Tennessee Performance Indicators. Subject areas covered by the testing program include Mathematics, Language Arts, History, and Science.

Test development

For the *Tennessee End of Course Assessment*, a staff of writers—composed of both teachers and professional test developers experienced in each of the content areas—researched and wrote the items. Professional editors and content specialists carefully reviewed all items and test directions for content and accuracy. To provide a large pool of items for final test selection, the test developers created approximately twice as many items as were needed in the final editions of the tests.

After tryout tests were administered, student responses were analyzed. Professional content editors and researchers carefully reviewed items, their data, and test directions for content, suitability, and accuracy before including particular items and test directions in operational tests.

Test administration

Tennessee End of Course Assessments are given to students as they near the end of courses that are included in the program. Tests may be given midyear for block schedules or near the end of the school year.

This test contains 65 multiple-choice questions.

You will have ample time to read and answer each of the questions. The English I test has been designed to be administered in one session and is not timed.* The first 15 minutes are set aside to complete identifying data on the answer sheet.

*The English I test formerly featured a 110-minute time limit.

Tips for Taking the Test

Preparing for the test

- Review this Tennessee End of Course Item Sampler for English I carefully and thoroughly.
- Acquire a Tennessee End of Course Practice Test for English I, and take the test several times.
- Become familiar with the correct way to mark answers on the answer sheet. There is a sample answer sheet in the Practice Test.

Before the test

- Get a good night's sleep. To do your best, you need to be rested.

During the test

- Relax. It is normal to be somewhat nervous before the test. Try to relax and not worry.
- Listen. Listen to and read the test directions carefully. Ask for an explanation of the directions if you do not understand them.
- Plan your time. Do not spend too much time on any one question. If a question seems to take too long, skip it and return to it later. Answer all questions you are sure of first.
- Think. If you are not sure how to answer a question, read it again and try your best to answer the question. Rule out answer choices that you know are incorrect and choose from those that remain.

Directions for Using the Item Sampler

This Item Sampler for English I provides specific information to students and teachers. It contains examples of different item types for each Performance Indicator that may be tested in any given end of course test administration. Performance Indicators have been grouped under Reporting Categories. These Reporting Categories will be used to report information regarding performance on the end of course tests to students, teachers, schools, and systems.

The items in this Item Sampler will not be found in the end of course tests. The number of items in this Item Sampler does not reflect the emphasis of content on the test. In order to identify the emphasis of content, the End of Course Assessment Practice Test for English I should be used. The Practice Test gives a better representation of content emphasis across Reporting Categories and Performance Indicators.

An Answer Key is located on Page 62. Use it to check your answers. Review items that you get wrong.

Dear Mrs. Schmidt:

- 1** My name is Bryce Johnson I am a freshman at Mellon High School. My English, teacher Mrs. McLeary recently mentioned you. She said that, “you have done wonderful work since graduating from Mellon High.” She spoke very highly of you as a student, even showing we students some of your writing projects as models to follow.
- 2** What most impressed me, though, was your current job directing “Education Without Borders.” I realize that by attending a school such as Mellon High I am more fortunate than many young people. There are students around the globe who lack the materials that we have available to us. Some children even lack schools entirely. Organizations such as yours, with its free delivery of educational materials to such places, are desperately needed.
- 3** I am wondering if there are any opportunities within your company for young volunteers. I am a very organized and energetic student. I could assist you in any capacity, from filing or processing documents to helping with the shipping of materials. Please let me know. If you have any need for my services.

Respectfully,

Bryce Johnson

Not Your Typical Summer

- 1 Trish, for one reason or another, had been dreading the start of another typical summer. Hanging out with friends, talking on the phone, babysitting, and riding around on her bike had become, well, boring. When she saw the flyer in Mrs. Carter's science room looking for volunteers to help turn a plot of unused school property into a vegetable garden this summer, it sounded like the perfect idea. She flew into action.
- 2 Though none of Trish's friends had ever even set foot in a vegetable garden, it wasn't difficult for her to convince them to sign up as volunteers. Mike canceled plans to visit an amusement park. Shantel was glad to turn over her babysitting duties to her younger sister. Maria, like Trish, was overjoyed at the prospect of having something productive to do with her summer. So the day after school let out, when other students were scampering off like puppies just let loose, Trish and her friends went back to school to meet with Mrs. Carter.
- 3 The plan sounded great. There was a piece of unused property tucked behind the bus garage where they would plant a variety of vegetables. As the vegetables ripened, the students would deliver them to the local food pantry. Not only would they be outside together, but they would also be working for a very good cause. Trish couldn't wait to get started. The friends all agreed to be at the plot at 9:30 the next morning.
- 4 The first days were brutal. Although the concept of the garden sounded like great fun, the actual work required was like the twelve labors of Hercules. The friends took turns operating a rototiller, a heavy device with a noisy engine that breaks up soil and shakes the user's arms until they turn numb. They took 50-pound bags of compost and spread the fertilizer over the entire plot. After that, they mixed the fertilizer into the soil. What was supposed to be a tranquil, relaxing summer of gardening had left the group with aching muscles and sore hands. Each of them started to doubt whether all this work was worth it, but none of them wanted to be the first one to quit.
- 5 When the soil was prepared, they began to plant. Carrots, lettuce, beans, and peas were all planted in rows as seeds. Tomatoes and peppers were put into the ground as small plants. Potatoes, to their surprise, were planted by dropping actual potatoes into holes in the soil. Mrs. Carter had to assure them that, yes, the potatoes would actually produce potato plants!

- 6** The friends were very grateful to have been able to do something so important with a piece of otherwise unused ground. The students spent hours picking baskets of produce, which they and Mrs. Carter then delivered to the food pantry. The volunteer board was amazed at the quantity and quality of vegetables and offered Mrs. Carter his or her thanks. In late summer the vegetables became ripe. Even though the days were hot and the work exhausting, at least it wasn't another typical summer.

Real Life Unplugged

by Karen E. Dill

Dr. Karen Dill is a psychologist who studied the effects of media violence on children and other related issues. She has been invited to deliver speeches to parents and students in middle school through college on several occasions. This speech was delivered on March 6, 2003.

I am a social psychologist, and I've done research on aggression, video game violence, and on how women and minorities are portrayed in video games. What I've found in all this research can really be boiled down to a simple phrase: "Garbage in, garbage out."

Other forms of media such as television and movies often teach such antisocial lessons as well. These forms of media, by and large, glorify violence and consumerism.

I would argue that the media, whether it be video games, television, or the Internet, has too often taken the place of what I would call "real life." On a yearly basis, kids spend more time watching TV than they spend in school. Watching TV is the number one waking activity of kids, and it is quickly being joined in popularity by video game playing and Internet surfing.

Not only are the messages in the media typically antisocial, with the average 18-year-old witnessing over 200,000 acts of televised violence in his or her lifetime, but what's also crucial to understand is that media addiction is also important in that it displaces other activities. Research shows that when people consume more media, they are more likely to do poorly in school, to be poor readers, to have impaired social skills, to lower quality time with their family, and to be obese. Kids spend about 28 hours a week watching TV and about a half an hour talking to their dad. The television is on for 7 hours and 40 minutes a day in the average household, and individual family members typically watch different programs in different rooms. Forty percent of U.S. households report watching TV during dinner.

There are many issues here, all of which I would greatly enjoy discussing, but because of time constraints I will focus on one today. There is a national organization called TV-Turnoff Network, which sponsors a national TV-Turnoff Week each spring. This year it is from April 21–27. I am helping to organize, here in Hickory, a local TV-Turnoff Week. For one week, kids and parents pledge to watch no television and play no video games. One thing that has surprised me greatly as I've made plans for this year's TV-Turnoff Week is that kids simply don't know what they would do if they did turn off the media. The national organization includes suggestions to tell the kids for "TV-Free" activities. These include writing a story, washing the dog, riding a bike, and climbing a tree.

The fact that the kids truly don't know what to do if they are not watching TV amazes me, and I think it's an important point. People my age and older might not be aware of this mentality. I know when I was growing up, our television simply carried three local networks. We did not have cable, the Internet, or even a VCR, so consequently I did not grow up in a media-saturated environment like our kids do today.

I want you to think about something. Think about a moment from your life when you felt happy to be alive. Think about a time when you felt fulfilled as a person, a time when you felt joy, one of those times you will never forget. At the end of your life, you could look back on this moment and count it as one of your favorites. Okay, take a moment to think of that memory . . . Now let me ask you a question. How many people here remembered a time when you were watching TV, playing a video game, or surfing the Internet? It's a ridiculous question, right? But many people today spend the great majority of their lives doing three basic things: 1) working, 2) necessary functions like eating and sleeping, and 3) watching TV or other media. Is that real life? Is that living? For how many households in America do you think this is true? It's true for the majority of Americans.

The creative act is meaningful. Sharing your experiences with other people is meaningful. Sitting in front of the TV or video game terminal for hours a day wastes precious time that could be spent really living. It's easy to get caught up in a rut of media use and not realize it.

Do you have kids who are spending most of their time plugged into media and unplugged from life? How about grandkids? How about you yourself? If so, then I encourage you to try something different. Write a song, trace your family tree . . . clog dance in the front yard if you want to. I know you won't regret it. And I know that years from now, it will be much more memorable than watching another tired episode of the latest sitcom.

Library Food

One day last month, I went to the public library because I needed to check my e-mail and apply for a summer job online. The librarian instructed me to sign my name on the waiting list, and an *hour* later I was seated at a computer terminal. I read through my e-mail, replied to several, and moved on to the job application. Midway through the application process, I felt a tap on my shoulder. It was the librarian. “I’m sorry, sir,” she said. “But your time’s up. You’ll have to log out.”

“But I’m in the middle of filling out a job application,” I replied.

“Take a few minutes,” she said. “But you’ll need to log out shortly.”

I tried to complete the application, but had to stop midstream because it was taking so long. I logged myself out and left. I never did get that job.

Because we do so much online and our demand for computers is exploding, Americans need access to computers more than ever before. One can predict that the need for access is only going to increase. It is true that more Americans are acquiring computers, but computers are still not as prevalent in homes as televisions or telephones. Libraries, thus, have a responsibility to their patrons to provide enough computers to meet the demand the public has for online information and business.

Some people say that using the library for Internet access is turning the library into something other than a library. The traditional quiet space for studying and reading has now become a noisy waiting room for Internet users. I agree. It is noisier. To me, however, that is a problem we need to work through and not a problem that should cause us to throw up our hands and banish computers from libraries. I think there are ways we can have both Internet access and quiet. The argument stands—libraries, at least modern ones, must cater to the need for Internet access.

Most libraries now have some computers for this purpose. But the question is not “Do they have computers?” The question is “Do they have enough computers?” You would not think that farmers were adequately providing food simply because they were growing some wheat. No. You would want to know if they were growing enough wheat to feed the people. If they weren’t, you’d say, “I think we need to take a look at our farming practices.”

Now perhaps my experience applying for that summer job last month was an isolated incident for the library. Maybe it was a very busy day. However, if that scene represents an average day, the library needs to work on providing for the people’s needs; on the day I was there, it was not doing so. And over time, the people are only going to get hungrier for Internet access.

34 Which of the following is a summary, not a paraphrase, of the first four paragraphs of the passage?

- F** A patron visited the library to answer e-mail and fill out a job application. He was surprised to find that there was a one-hour wait for the computers and put his name on a waiting list. Before he could finish his work, though, the librarian informed him that his time was up.
- G** A patron waited an hour to get seated at a computer in the public library. He needed to check his e-mail and apply for a summer job. After reading through his e-mail and replying to several, he moved on to the job application. Before long, though, he felt a tap on his shoulder. It was the librarian who had asked him to sign the waiting list; she said it was already time for him to log out.
- H** A patron visited the library to use a computer, but he had to wait an hour before one was available. Finally he got access to a computer and was able to read his e-mail. He answered some of his e-mail and began work on an application for a job he wanted.

They Don't Bark, You Know

by Keri Dearborn

Shush, shush, shush
Rails slide over frozen trail

Crunch crunch
 Crunch crunch
Boots break through icy crust

The quiet of mid winter
Broken only by the creak of a sled
Gentle padding of dog feet
Rhythmic roar
Of your own breath

White landscape
Stretches to meet the pale sky
Where the sun skips across the horizon
Like a stone on water

Sherbet colored clouds
Follow in the sun's wake
Lapping like waves
Against the distant mountains

Ice crystals form in nostrils
Cheeks sting in the frozen air

Hold your breath and listen
To the vastness
 Of the untamed frontier

It is true that while sled dogs are mushing, they are silent. Before they set out, they bark, yip, and sing. Those dogs that are not chosen howl when they are left behind. The dogs in the traces grin from ear to ear. As you head across the snow, all you hear is the padding of their feet. There is nothing like it.—K.D.

The Concert

by Elspeth Iralu

The tree waves its branches
as if it were a conductor.
It sends its leaves out to dance in the wind.
They are the dancers
and the wind sweeps them onto their stage.
The birds are the singers.
They sing their songs.
The musicians are the winds,
north, south, east, west.
The audience, the flowers.
They listen in silence,
in awe,
in satisfaction.

When the fall concert is over,
winter comes to close the curtains.
Everyone hushes and waits for the spring.

First Woman to Fly the English Channel, 1912

Before Amelia Earhart,¹ it was Harriet Quimby who captured the public’s imagination as America’s premier aviatrix. Born in 1875, Harriet arrived in New York City in 1903, landing a job as a reporter with *Leslie’s Illustrated Weekly*. She was a remarkable woman endowed with natural beauty, flamboyance, a penchant² for adventure, and a flare for self-promotion.

Her role as a theater critic for *Leslie’s* brought her into contact with New York’s “Jet Set” of the day. Here she met a flying instructor and asked him if he would teach her to fly. She began her lessons in May 1911 at a flying school on Long Island, becoming the first woman to begin flight training.

The airplanes of the day were rickety affairs—collections of wood and canvas held together with piano wire. There was no science of flight, no rules on design or construction; the books were still being written. Experimentation was done in the air and lessons learned through fatal accidents. Harriet proved she had a natural flying ability, excelled in her training, and earned her pilot’s license in August—the first American woman to achieve this.

She immediately joined the exhibition circuit, flying at meets in this country and Mexico. Dressed in her plum-colored, satin flying suit adorned with elegant jewelry, she became an immediate sensation. Her articles in *Leslie’s* sold thousands of newspapers and spread her fame. In 1912 she traveled to England, convincing the *London Daily Mirror* to fund her attempt to fly the English Channel in exchange for exclusive coverage. It had been only three years since Frenchman Louis Blériot successfully flew across the Channel, and the attempt had never been made by a woman. Harriet made her flight in the early morning hours of April 16, reversing her French predecessor’s route by taking off from Dover. She landed her monoplane in triumph on the French shore near Calais, assuring her fame and assuming the title “America’s First Lady of the Air.”

Olympian Wilma Rudolph

- 1** World records, Olympic gold medals, and international fame are accomplishments admired by all but achieved by only a small percentage of people. Obviously, winning an Olympic gold medal would make anyone proud. When imagining such athletes today, we often picture incredibly athletic people. We think of those trained to perform from childhood, wearing the latest equipment and swimming in endorsement dollars. Sometimes this is indeed the case. For one of the Olympics' most impressive athletes, the exact opposite was true.
- 2** Wilma Rudolph was born into a large family in St. Bethlehem, Tennessee, in 1940. She had many physical problems. She was born prematurely, weighing slightly more than four pounds at birth. Later, she suffered from the measles, double pneumonia, and scarlet fever. She also contracted polio; it left her bedridden and nearly paralyzed her left leg. As a child she required a metal leg brace in order to walk.
- 3** She was later voted into the Women's Sports Hall of Fame. Against great odds, however, Rudolph rehabilitated herself and became the greatest athlete of her time. This was a first for an American woman. Under the guidance of Tennessee State University track coach Ed Temple, Wilma Rudolph won three gold medals at the 1960 Rome Olympics. Although Wilma Rudolph passed away in 1994, she continues to serve as a good role model for athletes around the world.
